DIGITAL DEFENSE RELEASES LATEST VERSION OF EDUCATIONAL SERVICE

San Antonio, TX – January 22, 2007 – Digital Defense, Inc., a provider of network security compliance and risk management services, today announced the latest release of their popular educational offering, Security Training, Education and Awareness Module (TEAM™). This release consists of a new topical course, which is entitled Child Safety Online. Security TEAM is a Learning Management System (LMS) that enables organizations to equip their clients who use online services with the fundamental security education they need to avoid cyber-threats, and thus feel comfortable making use of the investment the organization has made in their online services. The TEAM LMS content is delivered in both English and Spanish translations in order to reach a greater number of online patrons.

“Digital Defense is pleased to deliver this important new course as part of the growing TEAM LMS offering.” said Larry R. Hurtado, president and CEO of Digital Defense. “Our clients realize the significance of making educational opportunities on security and identity theft available to their online patrons. We are proud to support them in the area of client education through our ongoing investment in the evolution of our Security TEAM LMS platform.”

The TEAM LMS currently consists of eleven courses, associated tests, and completion certificates on the following topics: Online Fraud, Passwords, Viruses/Worms, Trojans & Spyware, Home Firewalls, Securing Home Computers, Secure Transactions Away from Home, Online Banking Myths and ATM & Debit Card Misuse, in addition to the new Child Safety Online course. There is also a special section related to ID Theft topics. Furthermore, the Security TEAM LMS platform provides organizations with statistics on customer usage of the training offering. Digital Defense enhances the TEAM service with additional courses each quarter.

About Digital Defense

Digital Defense, Inc., a privately held firm based in San Antonio, Texas, delivers a comprehensive portfolio of risk management services including information security programs, regulatory compliance solutions, security testing of IT products and security education offerings to financial institutions and enterprises that utilize Internet Protocol-based technology in their business operations. Digital Defense and its Security Operations team uses proprietary technology and industry best practices to deliver a

broad array of services to its clients, which range from small financial institutions to global Fortune enterprises. We offer packaged solutions that can be tailored to meet the specific needs of our client organizations. This flexible approach allows clients to embrace the responsibility of protecting their information assets for their employees, customers and shareholders in a manner that can be best supported by their businesses. Frontline™, Digital Defense's flagship service portal, provides clients with instant access to a security information management platform that enables independent oversight of their organization's security posture on an autonomous or Digital Defense managed service basis.
